

**Fast de-solving  
with new  
Super Mixer**

**New Super Mixer  
De-solves salt very fast**

Make the system very accurate in de-solving and blending time is now very short.

Due to new technology and R&D Traust Know-How offer all brine mixing system with this new Super Mixer build in high quality Stainless Steel 316

**Online Brine Mixing Systems**

**The most flexible and easy to operate systems**

Our online system are newly modernized and is now more flexible and easier to operate. The whole concept is constructed having that in mind that they are easy to install, easy to operate and very flexible. Installation cost is reduced by single online pipeline for all components and additives. On touch screen display where all operation are done and input of recipes.

- Preprogrammed recipes can be stored in memory**
- Multi additives can be mixed with the brine.**
- Different delivery spot connect to the same system.**
- Many recipes is operated at the same time**
- Compact system for easy transport and installation**
- Fast de-solving of salt and additives**
- Many marinates mixture operating at the same time**

The new Online Brine Mixing System is equipped with internal filter system. This is done to avoid dirt and particles to spread into pipeline, pumps valves and detectors. This make the system much accurate and avoid interrupts in running.

The system have all possibilities to add on different advantages such as required numbers of delivery stations that can be in operation simultaneously and as well holding and blending tanks for different additives and mixtures.

We can deliver with out system integrated chilling system that can keep the brine at constant temperature during operation.
