Conveyors - Modular & Belts
Custom solutions for any application

- Efficient conveyors for fish processing
- Comprehensive solution range
- Processing lines for any application
- Automation available
- Turn-Key solutions

Advanced Modular & Belts

For food industry - FDA/USDA approved

Ammeraal Beltech
Innovation & Service in Belting

uni chains

Available is an extensive range of conveyors and flow-lines with modules addressing each manufacturing state. Years of experience, our solutions are state of the art.

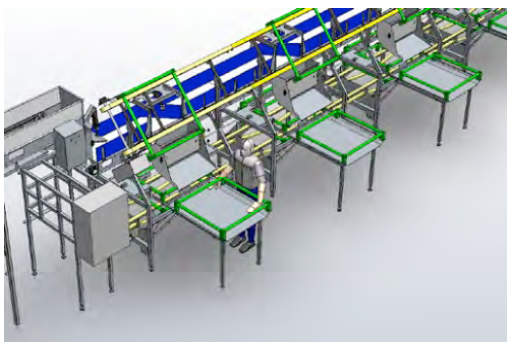

Modular conveyor belts.

• Repels fat and water
• Easy to join
• Easy shipping. Folds up.
• Easy to take apart for extension

PVC conveyor belts to meet any requirement.

• Grease and water resistant
• Easy to weld together
• Easy to weld in flights
• For Fish, Meat, Bakery, Canning,

Ammeraal´s Amseal blue edges resist bacteria growth, no belt edge fray contaminating products, prevents entering the belt, less maintenance, longer belt life, no belt stretch or slip, excellent tracking, remains flat.

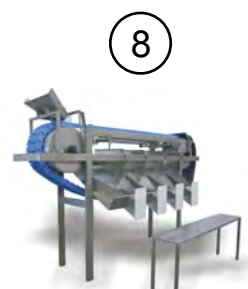

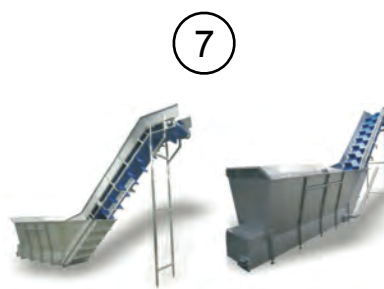

Fish head processing-line

Easy-Layer automatic layer

Robotic solutions

High Quality Conveyors

Multiple solutions. Handles raw material gently

1) Trimming flow-line
2) Belt & modular conveyor
3) Modular conveyor
4) Screw conveyor
5) Belt conveyor filter
6) Modular angle conveyor
7) Modular in-feed buffers
8) Modular channel grader
9) Shell cooker conveyor
10) Freezing tunnel conveyor

Benefits:
- Complete solutions
- Automatic process
- Scalable capacity
- Measurable labor savings
- Energy efficient flow-lines
- Grader raw material yield
- Customized solutions
- Flexible processing modules
- Easy to clean & sanitize
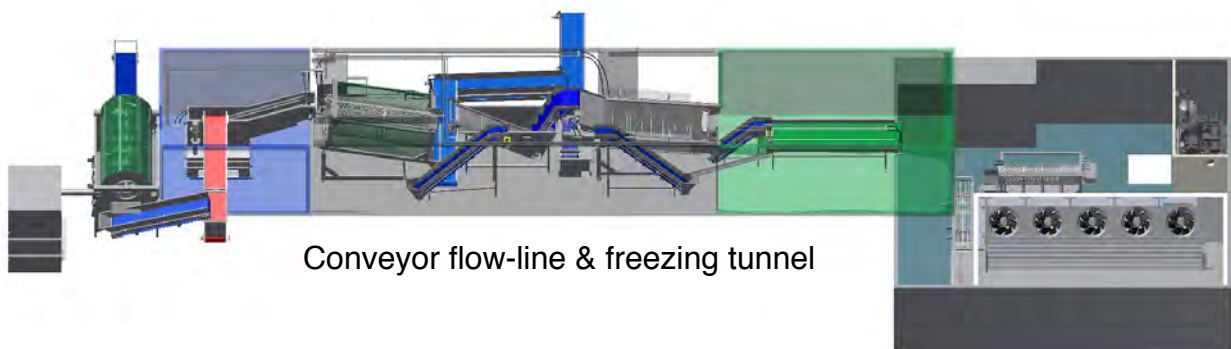

Auto feeding & weighing

Scrub & cleaning line

Floe-line with 6 work stations

Conveyor Flow Line Floor Plan

Our engineers design and custom build each application from our extensive range of flow-lines, with modules addressing each manufacturing state. Our solutions are extremely rugged and manufactured with state of the art technology for any food product that needs to be processed on a Flow-Line.

Conveyor flow-line & freezing tunnel

Optimize your investment with custom-made solutions
Traust Know How, Ltd., has been a leader developing fish processing equipment for over 30 years. Our qualified team of engineers with years of experience, design and develop all our fish processing plants/equipment, to suit the need of the fish processing industry around the world.
